

REMARKS

Originally presented claims 1-9 have been cancelled. Applicant notes that in the office action only originally presented claim 1 was examined. New claims 10-14 have been added.

Claim 10 recites, in conjunction with a combination of other elements:

“wherein each of the memories is removable independently of the other memories; and

wherein each of the memories is replaceable with another memory with a code in the memory associated with the different radio frequency code signal.”

The combination of these two limitations with the remainder of the elements of claim 10 is not found in the prior art, and is not taught by the combination of references presented by the Examiner in the office action.

Claim 12 recites, in conjunction with a combination of other elements:

“wherein each memory is removable such that when the first radio frequency transmitter is lost, the memory corresponding to the first radio frequency transmitter is removed; and

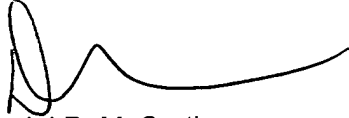

wherein the codes in each of the different memories are different.”

The combination of these two limitations with the remainder of the elements of claim 10 is not found in the prior art, and is not taught by the combination of references presented by the Examiner in the office action.

In addition, the limitations of dependent claims 11, 13 and 14 are not shown by the prior art in conjunction with the other elements of the independent claims.

Reconsideration is requested. If any fees are due, those fees should be charged to Deposit Account No. 50-0581.

Respectfully submitted this 30th day of January, 2006.
